

Wahine Talk

Preventing unintended pregnancies among homeless and at-risk youth

Stabilization through Support Services

- Outreach to meet the youth where they are
- Provide biopsychosocial needs and emotional support

Access to Medical Care

- Provide onsite clinic & partner with medical facilities to promote medical home

- Accompany and provide transportation to appointments to reduce barriers to accessing care

Increase Sexual Health Knowledge

- Weekly group sessions with community education and peer mentor
- Learn about long-acting reversible contraception and healthy lifestyles

Build Trust and Connectedness with Staff and Peers

- Weekly texts & interactions with peer mentor
- Open dialogue and ongoing support

Utilize Incentives and Technology

- Build social connectedness
- Overcome socioeconomic barriers
